ShiftSmart Mobile Application

User Story

Project Overview

ShiftSmart is a mobile application used to manage employee shifts and attendance.
Employees and managers use the same login system.
Employees record their working time, apply leave, and communicate with managers.
Managers manage companies, sites, projects, jobs, shifts, and employees.
User registration must be approved from the admin side before login access is granted.
Location tracking is used for attendance and shift verification.

User Roles

- Employee
- Manager

User Stories

Common User Stories (Employee & Manager)

C1: User Registration

As a user
I want to register by providing my personal details
So that I can request access to the application

Acceptance Criteria:

- User can enter required details
- User can upload profile image and documents
- Registration request is sent to admin
- User cannot log in before approval

C2: Profile Details and Profile Image

As a user
I want to add and update my profile details and profile image
So that my account information is complete

Acceptance Criteria:

- Profile details can be edited
- Profile image is uploaded successfully

C3: Upload Documents

As a user
I want to upload required documents
So that my registration can be verified

Acceptance Criteria:
- Documents can be uploaded
- Documents are visible on admin side

C4: Login

As a user
I want to log in using my email and password
So that I can access the application

Acceptance Criteria:
- Email and password fields are available
- Login works with correct details
- Error message shows for incorrect details

C5: Biometric Login

As a user
I want to log in using Face ID or fingerprint
So that I can log in faster and securely

Acceptance Criteria:
- Biometric option is available
- Works on supported devices

C6: Reset Password

As a user
I want to reset my password
So that I can access my account if I forget it

Acceptance Criteria:
- Password reset option is available
- New password can be set successfully

C7: Change Password
