ShiftSmart Mobile Application

Mobile App Issue Report

Date: May 14, 2026

Summary

Total Issues	**13**	**High**	**7**
Medium	**4**	**Low**	**2**

Issue List

ID	Screen / Feature	Issue	Priority
01	Update Manager Details - Next of Kin	Next of Kin - load/update failure	High
02	Generate Employee Performance Report	Invalid date range allowed	Medium
03	Manager Report - Attendance Report	Incorrect total hour calculation	High
04	Chat - Find Employee	Logged-in user appears in employee list	Medium
05	Chat - Conversation Detail	Sent message not visible inside conversation	High
06	Live Tracking - Search Field / Keyboard View	Background shifts when keyboard opens	Medium
07	Side Menu / Navigation Drawer	User name / role alignment issue	Low
08	Update Project - Step 2/2	Submission failure	High
09	Update Site	Save failure	High
10	Notifications	Tab alignment issue	Medium
11	Create Job / Update Job	Form data not loading	High
12	Create Shift	Operation failed on submit	High
13	Project List / Dashboard Tabs	Temporary UI overlap on load	Low

Issue 01 - Next of Kin - load/update failure

Screen / Feature	Update Manager Details - Next of Kin	**Priority**	High
Issue Type	Bug	**Status**	Open

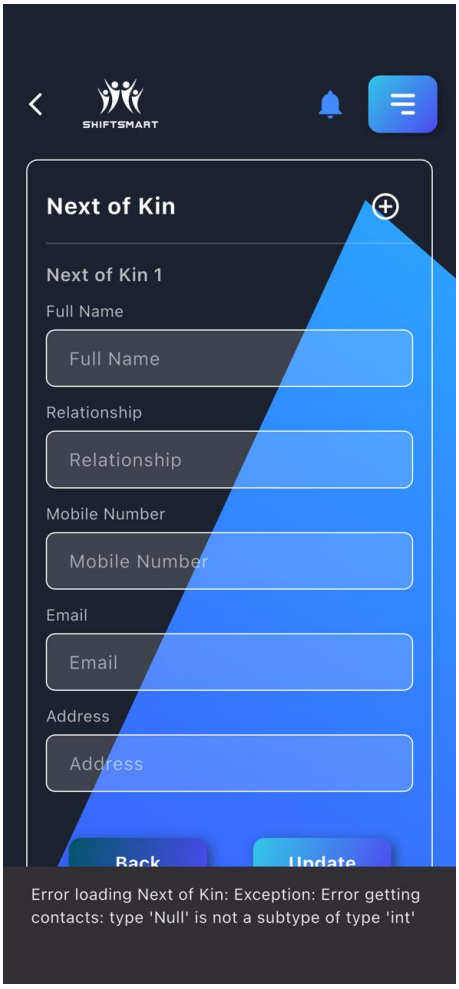

Observed Problem

• The Next of Kin screen shows a technical error while loading existing data: type 'Null' is not a subtype of type 'int'.

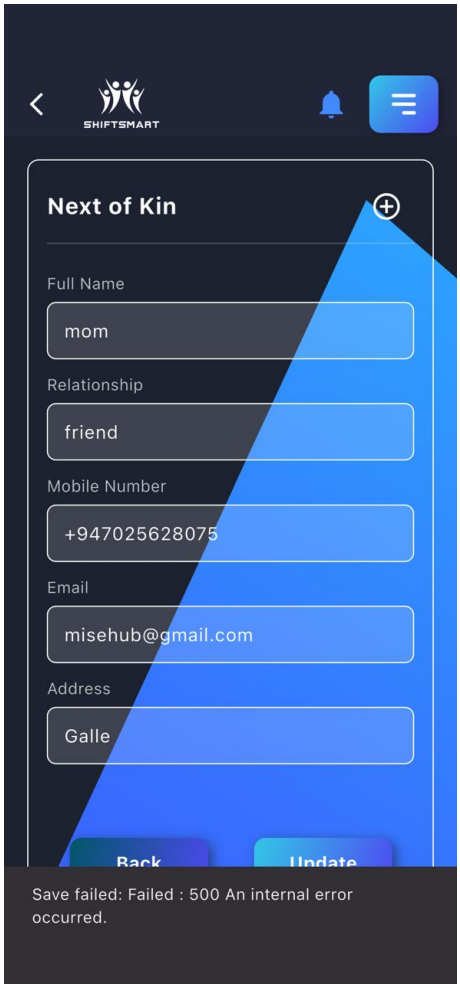

• After entering Next of Kin details and tapping Update, save fails with a 500 internal error.

Expected Result: Existing Next of Kin details should load correctly, and valid updates should save successfully without technical or server errors.

Evidence

Screenshot 2

Issue 02 - Invalid date range allowed

Screen / Feature	Generate Employee Performance Report	**Priority**	Medium
Issue Type	Validation Bug / UX Issue	**Status**	Open

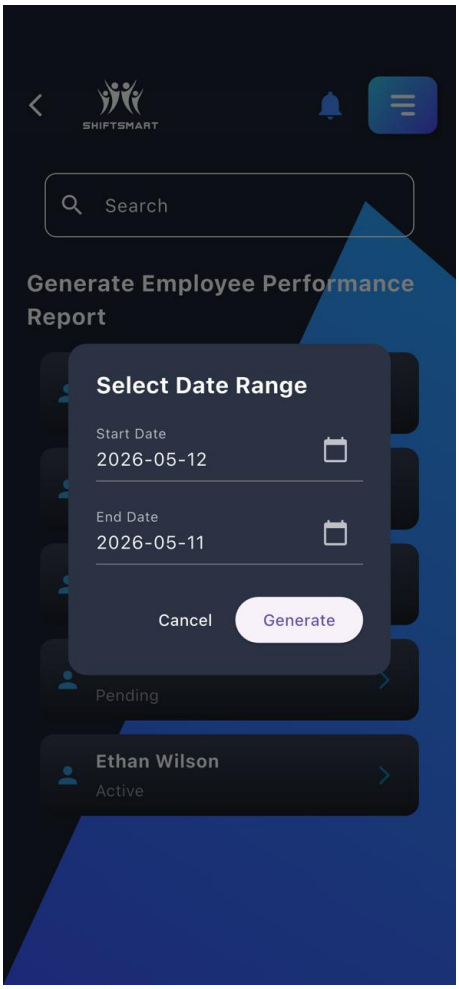

Observed Problem

• The form allows an End Date earlier than the Start Date.

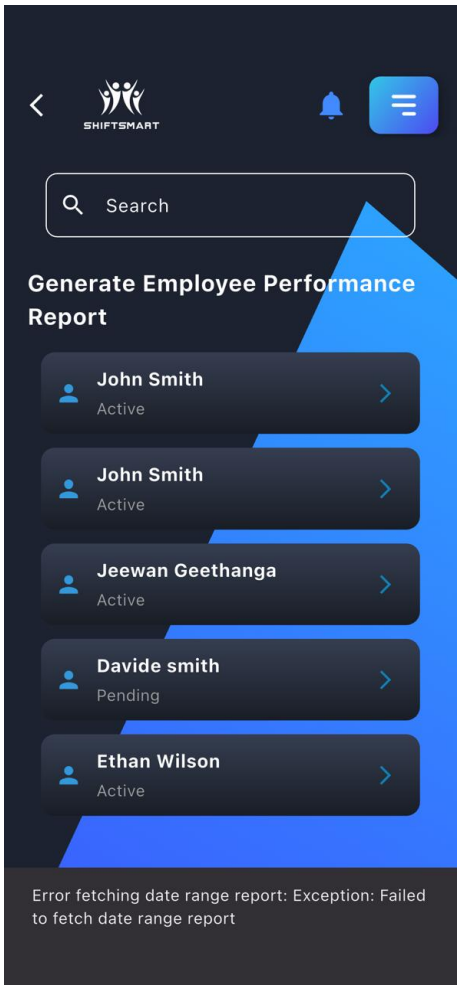

• After tapping Generate with an invalid date range, the app shows an error instead of preventing submission.

Expected Result: The app should block invalid date ranges and show a clear validation message such as "End Date cannot be earlier than Start Date."

Evidence

Screenshot 2

Issue 03 - Incorrect total hour calculation

Screen / Feature	Manager Report - Attendance Report	**Priority**	High
Issue Type	Time Calculation Bug	**Status**	Open

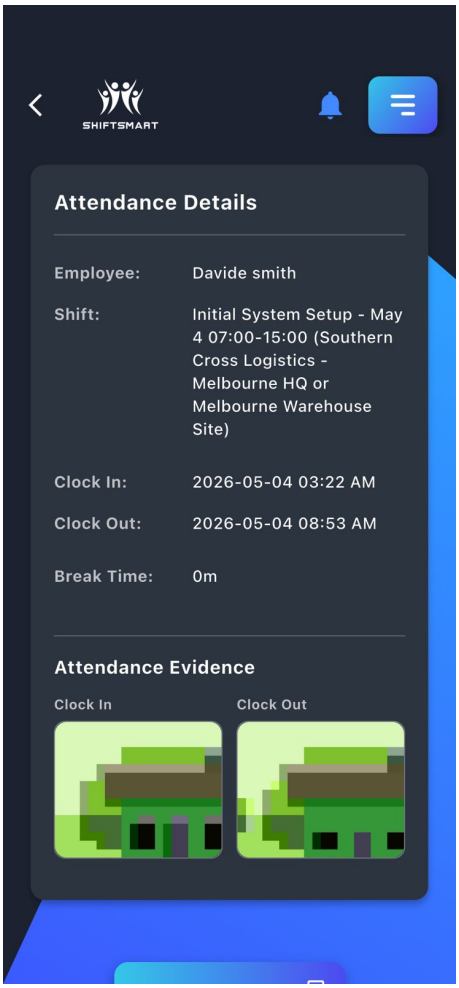

Observed Problem

• Clock In is 03:22 AM and Clock Out is 08:53 AM, so the actual duration is 5 hours 31 minutes.

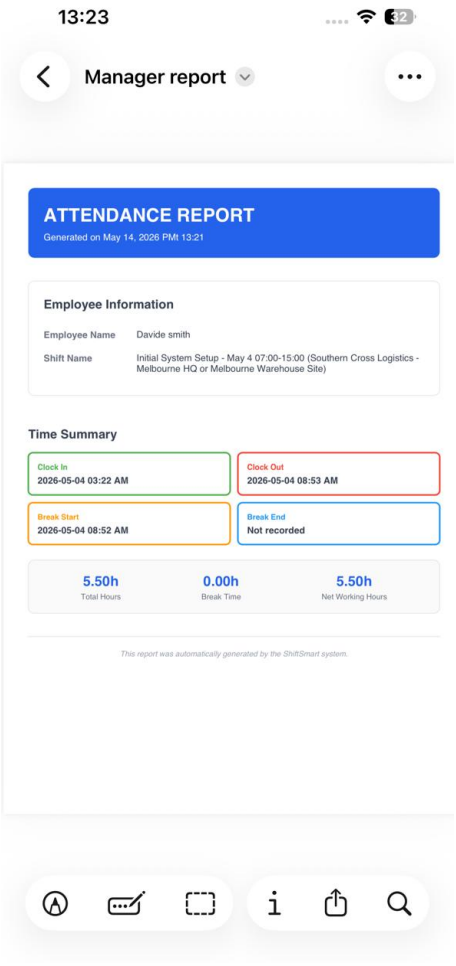

• The report displays Total Hours as 5.50h, which is inaccurate / unclear for the recorded times.

Expected Result: The system should display the correct worked duration, such as 5h 31m or approximately 5.52h if decimal hours are used.

Evidence

Screenshot 2

Issue 04 - Logged-in user appears in employee list

Screen / Feature	Chat - Find Employee	**Priority**	Medium
Issue Type	Bug / UX Issue	**Status**	Open

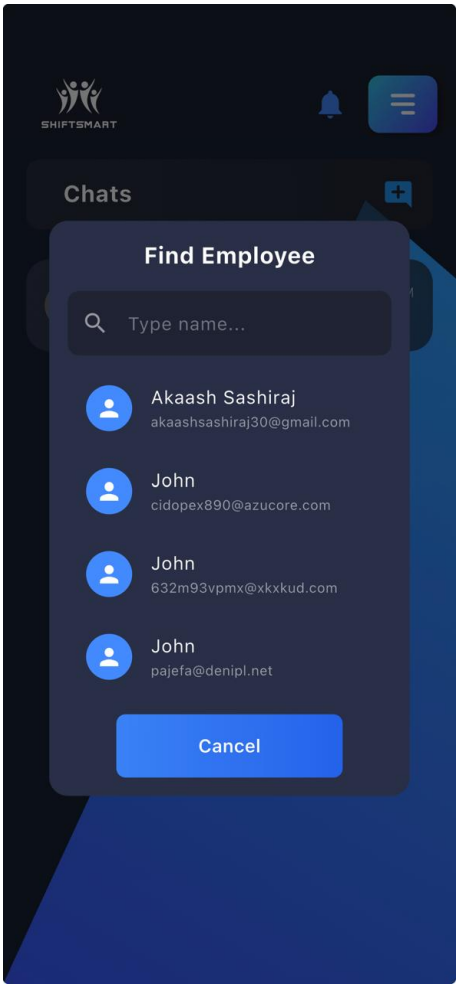

Observed Problem

• The logged-in user (Akaash Sashiraj) appears in the Find Employee list.

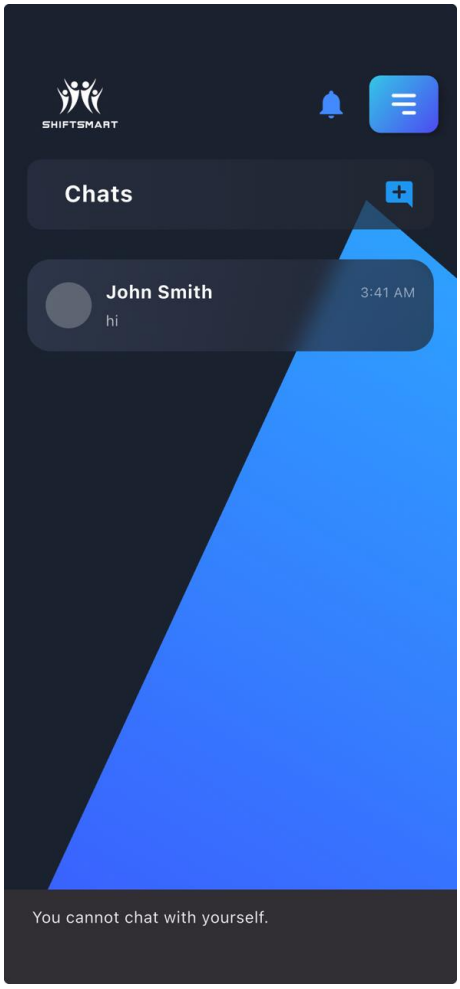

• When selected, the app shows "You cannot chat with yourself."

Expected Result: The currently logged-in user should be excluded from the employee search/list.

Evidence

Screenshot 2

Issue 05 - Sent message not visible inside conversation

Screen / Feature	Chat - Conversation Detail	Priority	High
Issue Type	Bug	Status	Open

Observed Problem

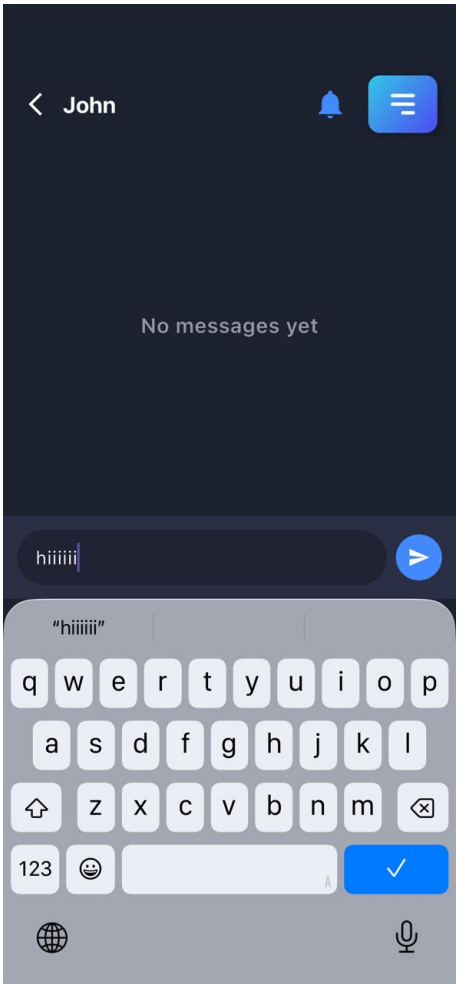

• A message can be sent successfully to another user.

• Inside the chat detail view, the screen still shows "No messages yet."

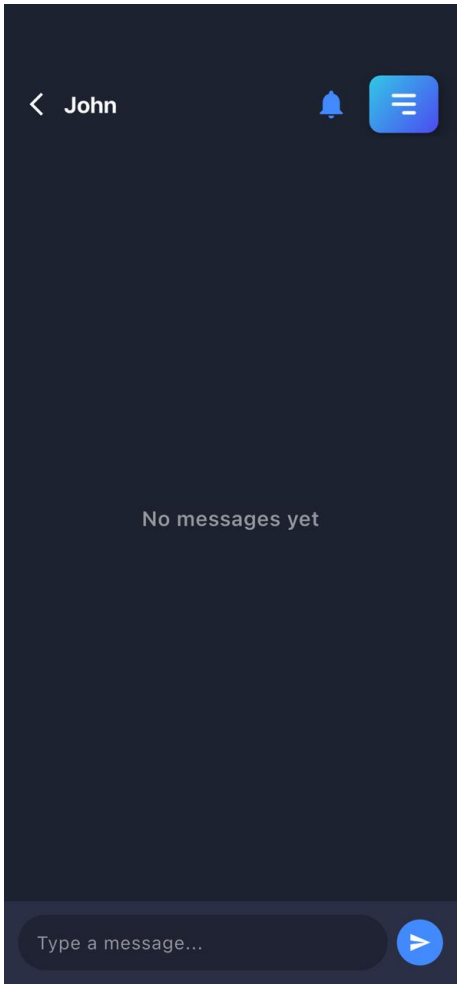

• The sent message appears only in the main chat list preview, not inside the conversation itself.

Expected Result: After sending a message, it should immediately appear inside the conversation thread.

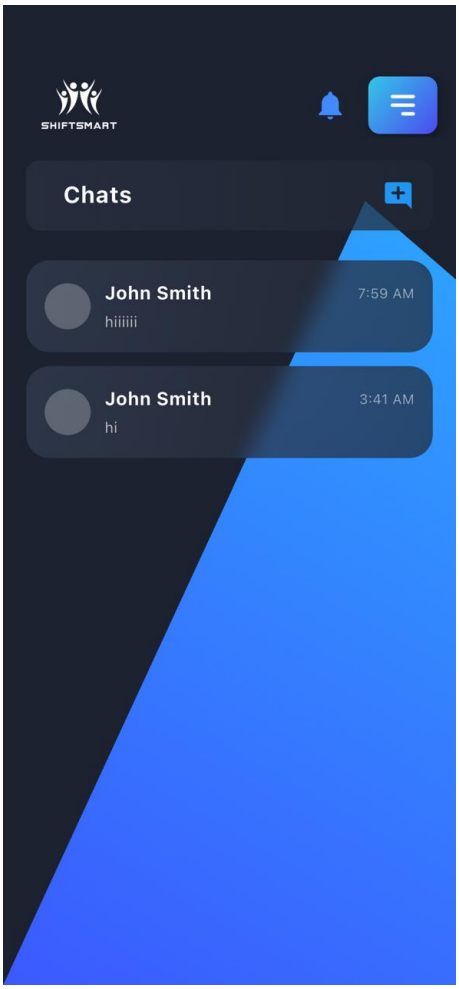

Evidence

Screenshot 2

Screenshot 3

Issue 06 - Background shifts when keyboard opens

Screen / Feature	Live Tracking - Search Field / Keyboard View	**Priority**	Medium
Issue Type	UI / Layout Issue	**Status**	Open

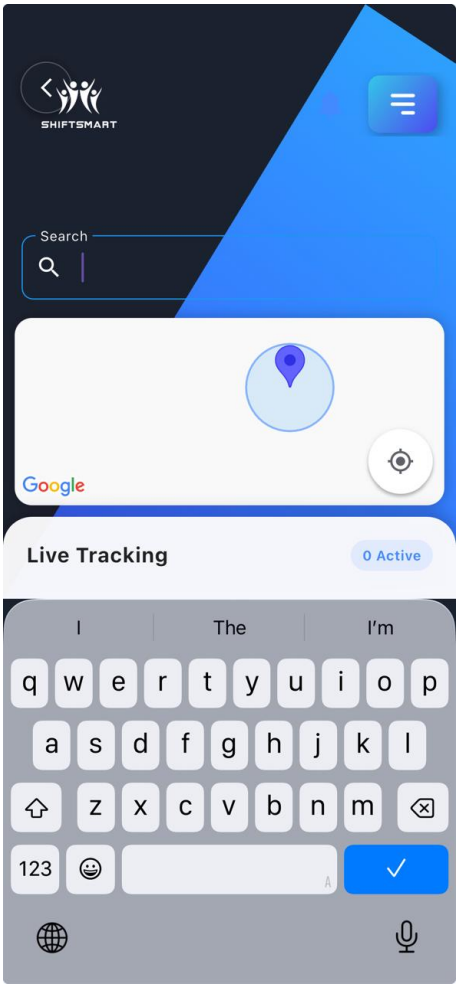

Observed Problem

• When the Search field is focused and the keyboard opens, the decorative background shape/layout shifts unexpectedly.

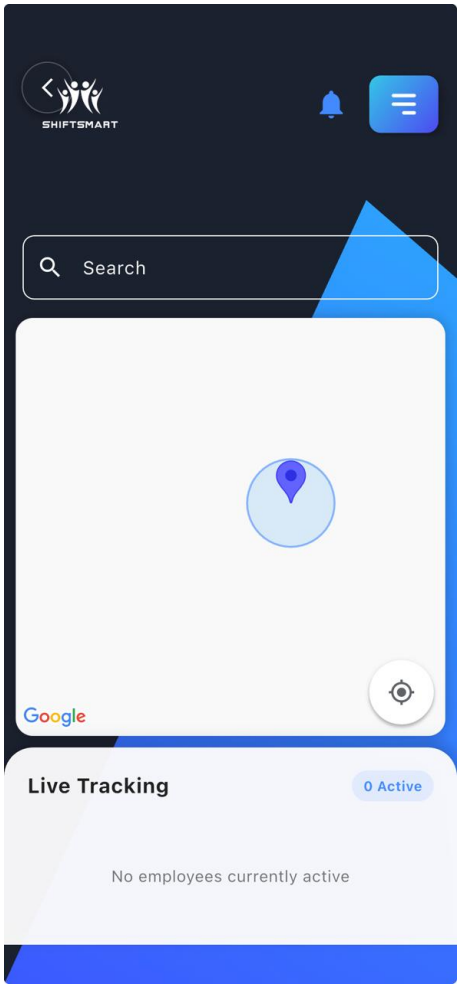

• The screen looks broken and inconsistent while the keyboard is visible.

Expected Result: Background design elements should remain fixed. Only the necessary input/content area should adjust for the keyboard.

Evidence

Screenshot 1

Screenshot 2

Issue 07 - User name / role alignment issue

Screen / Feature	Side Menu / Navigation Drawer	Priority	Low
Issue Type	UI Alignment Issue	Status	Open

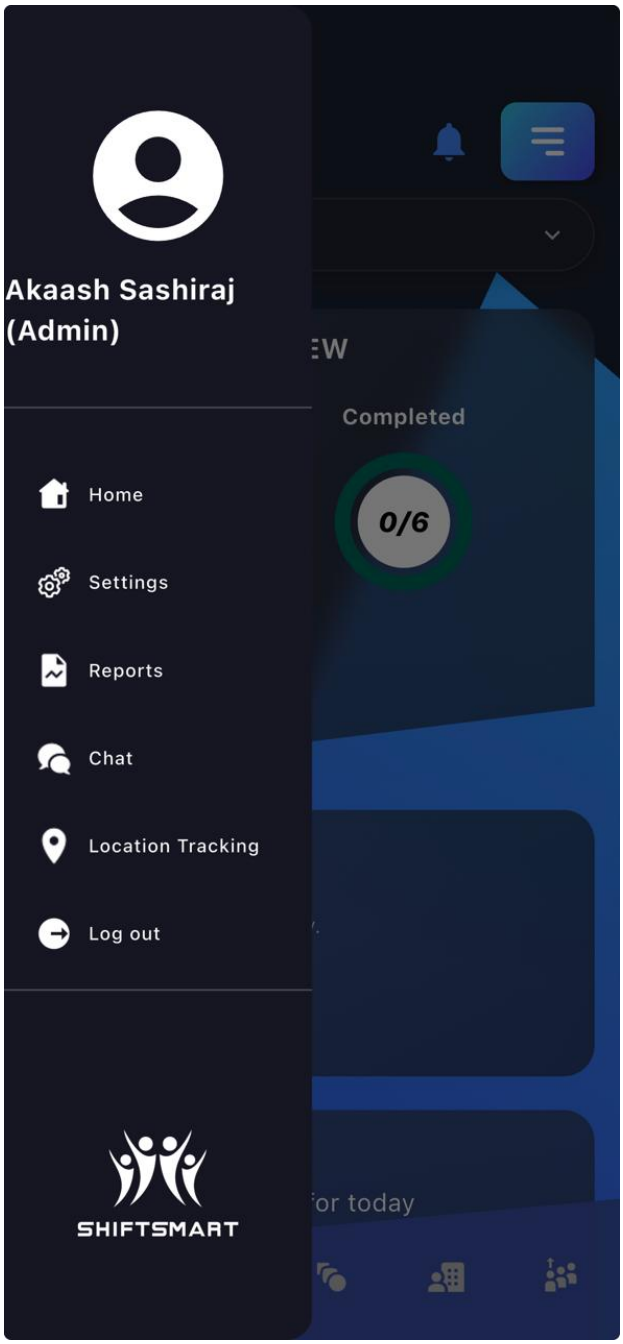

Observed Problem

• The text "Akaash Sashiraj (Admin)" is misaligned / cut off toward the left side of the drawer.

• This affects the visual quality of the navigation drawer.

Expected Result: The user name and role should be properly aligned within the drawer and wrap cleanly if needed.

Evidence

Screenshot

Issue 08 - Submission failure

Screen / Feature	Update Project - Step 2/2	**Priority**	High
Issue Type	Bug	**Status**	Open

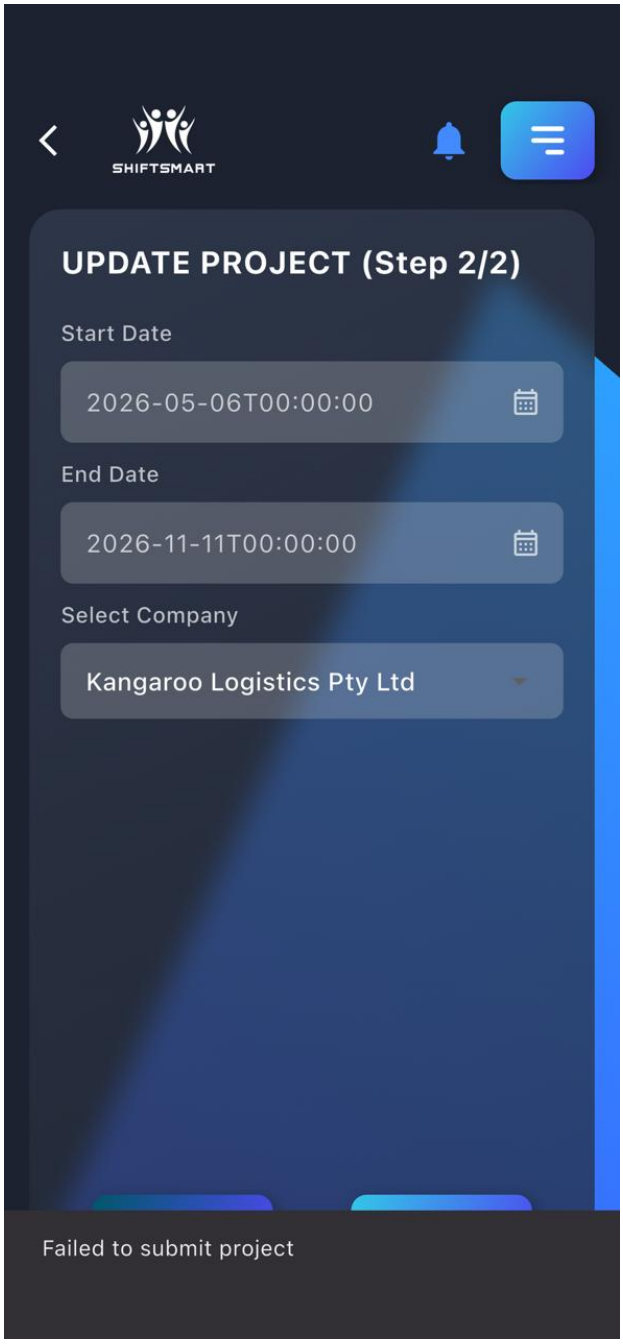

Observed Problem

• After entering valid project details and submitting, the app shows "Failed to submit project."

• Project details are not updated successfully.

Expected Result: The project should update successfully when valid details are provided.

Evidence

Screenshot

Issue 09 - Save failure

Screen / Feature	Update Site	Priority	High
Issue Type	Bug	Status	Open

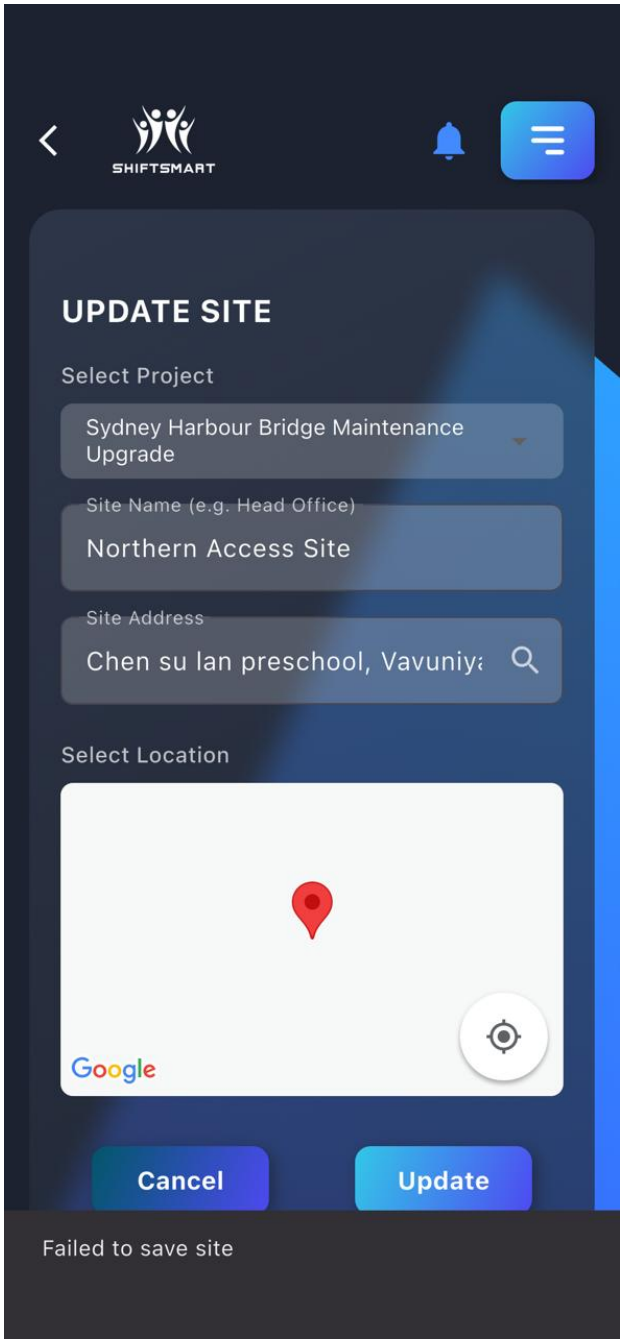

Observed Problem

• After filling the update site form and tapping Update, the app shows "Failed to save site."

• Site details are not updated successfully.

Expected Result: The site should update successfully when valid details are entered.

Evidence

Screenshot

Issue 10 - Tab alignment issue

Screen / Feature	Notifications	Priority	Medium
Issue Type	UI Layout Issue	Status	Open

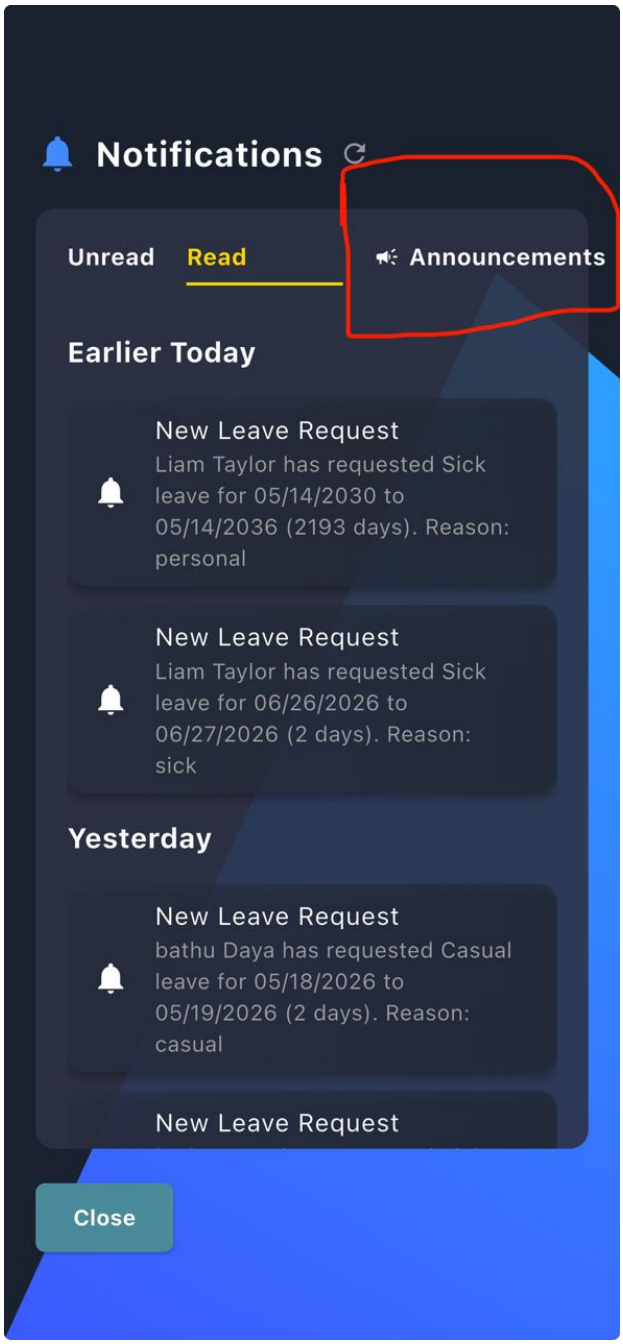

Observed Problem

• The Announcements tab appears too far to the right compared with Unread and Read.

• The tab row does not look visually balanced or consistently aligned.

Expected Result: Unread, Read, and Announcements should be aligned neatly in one row with consistent spacing.

Evidence

Screenshot

Issue 11 - Form data not loading

Screen / Feature	Create Job / Update Job	Priority	High
Issue Type	Bug	Status	Open

Observed Problem

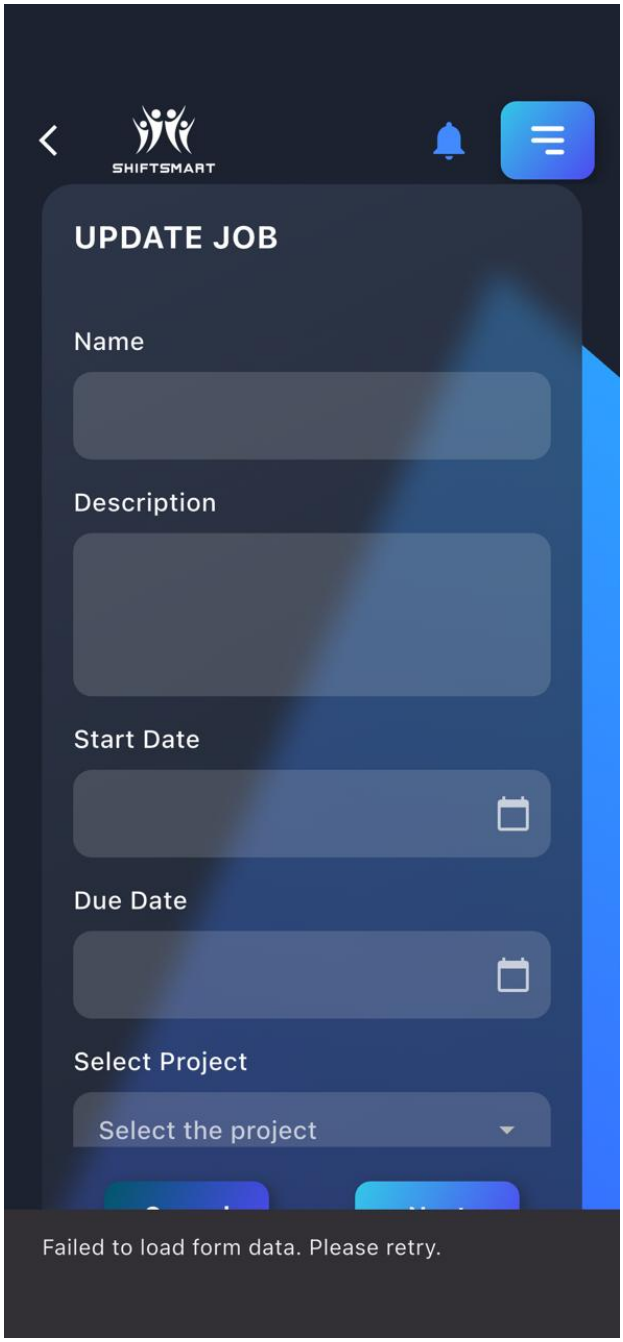

• The Job form fails to load required form data.

• In Update Job, fields such as Name, Description, Start Date, Due Date, and Project appear empty and the app shows "Failed to load form data. Please retry."

• The same loading/data issue is also reported in Create Job.

Expected Result: Required reference data should load in Create Job, and existing job details should load correctly in Update Job.

Evidence

Screenshot

Issue 12 - Operation failed on submit

Screen / Feature	Create Shift	Priority	High
Issue Type	Bug	Status	Open

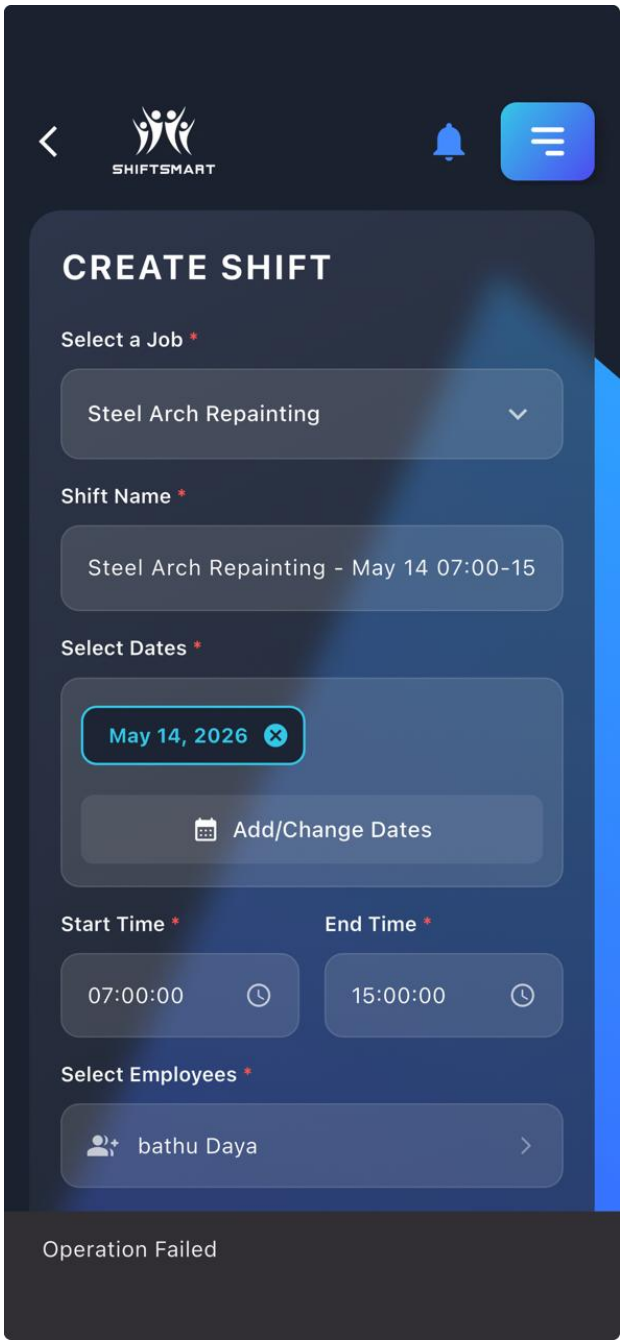

Observed Problem

• All visible required fields appear to be filled in the Create Shift form.

• On submit, the app shows "Operation Failed" and the shift is not created.

Expected Result: The shift should be created successfully when all required fields are completed with valid values.

Evidence

Screenshot

Issue 13 - Temporary UI overlap on load

Screen / Feature	Project List / Dashboard Tabs	Priority	Low
Issue Type	UI Rendering Issue	Status	Open

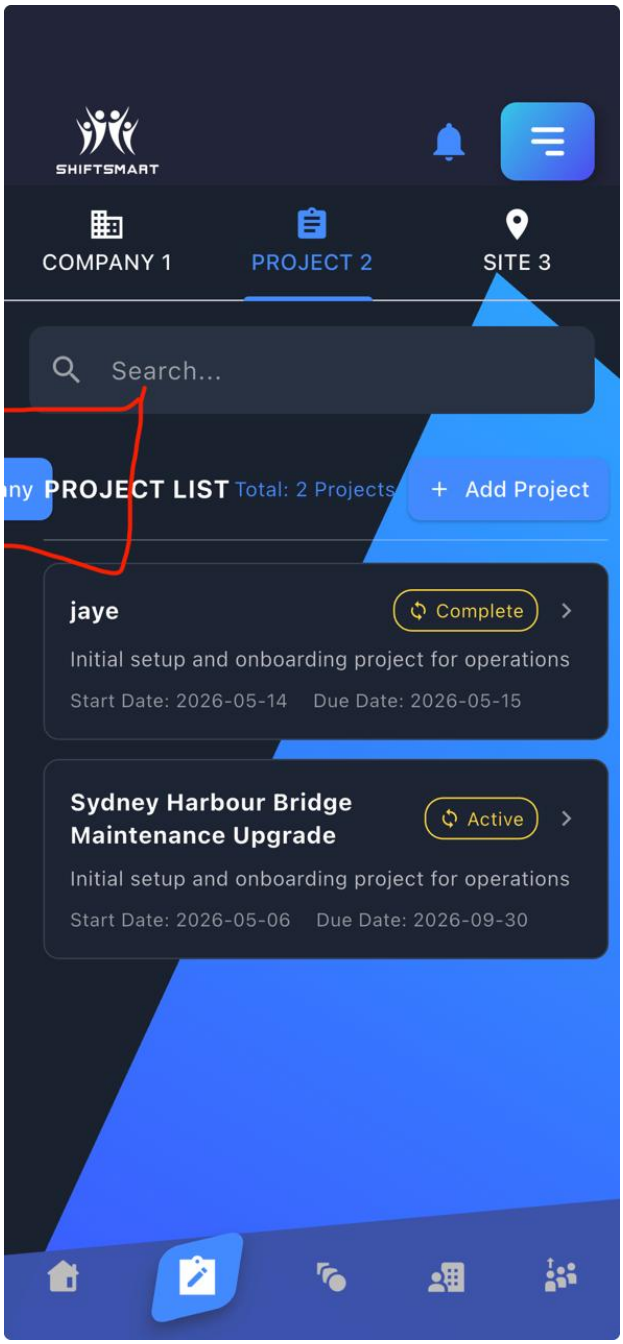

Observed Problem

• For about one second during screen load, UI elements near the search bar and section title overlap / appear misaligned.

• The issue disappears quickly but reduces the overall polish of the application.

Expected Result: The screen should render cleanly without temporary overlap or misalignment during loading.
